| 2017                                        |          |

## PERSONAL PROJECTS

### TODO-WEB-APP

I designed and implemented a Todo-web application using HTML, CSS, Bootstrap, jQuery, Node.js, Express.js, and MongoDB. This application allows users to register, login, and perform CRUD operations on their tasks. Users can add new tasks, edit existing tasks, and delete tasks as needed, providing a seamless task management experience.

### VIDEO-TUTORIAL

I developed a video tutorial platform where users need to register to access videos. Admin privileges allow exclusive content management. This project demonstrates my skills in full-stack development, including user authentication, CRUD operations, and responsive design. It highlights my ability to create convincing user experiences with robust admin controls.
